Protect your ears with GN Hearing

Swim Plugs

GN Hearing Swim Plugs are earmoulds specifically designed to protect the ear from water during activities, such as swimming and surfing. They assist with the prevention of ear disease and infection, and reduce common irritations that are associated with water sports.

Many people suffer from common water-related ear irritations. Conditions, such as Surfer's ear, Swimmer's ear and ear ache can be reduced by regularly using Swim Plugs during water sports. People with conditions, such as these, will most likely be advised by their doctor to keep their ears clean and dry while healing to avoid further complications and infection.

GN Hearing Swim Plugs work to protect your ears against water and moisture during water sport activities. They come in a range of fun colours and are designed to include a safety cord to ensure they stay together and are not easily lost during water sports.

GN Hearing Swim Plugs feature removal cord. Available in a range of colours.

GN Hearing cannot guarantee that these accessories will prevent all water leakage in all circumstances. Therefore GN Hearing is not liable for any medical complications that may arise. Please speak to your medical / hearing care professional with to assess your intention of use and individual medical circumstances for further advice.
